SUN 2010 Conference Big Success

The seventh annual SEMTECH Users' Network (SUN) Conference was attended by its largest international audience to date. The conference took place at Kensington Court in Ann Arbor, Michigan on September 21 and 22. Drew Kodjak of the International Council on Clean Transportation was the keynote speaker this year, providing the group with a Global Perspective on Clean Transportation. He was followed by several presenters that informed the audience about current and pending emissions legislation around the globe, and applications of PEMS.

We would like to thank all speakers and guests for joining us and for providing a very informative conference this year. Mark your calendars for the 2011 SUN Conference, which will take place at the Sheraton Hotel in Ann Arbor, MI on September 20-21.

Sensors and Froude Hofmann Form Partnership

Sensors, Inc. and Froude Hofmann announced a strategic partnership last month. The partnership combines Sensors' Portable Emissions Measurement System with Froude Hofmann's dynamometer and control systems, enabling a low cost stand alone or integrated emissions measurement solution for test cell applications. Measurement results have a strong correlation to those of traditional test cell emissions measurement systems, at a fraction of the complete life-cycle cost.

Customer Portal Launched

Sensors has launched a new customer-specific web site, enabling access to technical service bulletins, users' manuals and other libraries of information, along with new discussion boards and blogs. This site also replaces our previous SUN Forum discussion board. To gain access to this extranet service, please contact your account representative.
