## SUN 2011

Thank you all for another successful SEMTECH User Network conference. The SUN Conference, which took place in Ann Arbor, Michigan last week, saw over 80 attendees, representing 35 different companies. A special thank you to our guest speakers, who brought worldwide perspectives to the regulatory aspects of the industry, and to the applications and evaluations of PEMS. Presentations are now available to our existing customers through the SEMTECH customer portal.

2011 SUN Conference

## Mustang to Add Sensors' ECOSTAR System to Test Cell Portfolio

Sensors, Inc. has announced that Mustang Advanced Engineering, a leading supplier of advanced testing and measurement systems, has added the SEMTECH ECOSTAR to its test cell products portfolio. The ECOSTAR system is a new range of modular gaseous and particulate measurement devices that meet worldwide laboratory grade requirements. The addition of the ECOSTAR product line enables Mustang to provide turnkey emissions test cells (engine and chassis dynamometer) with certification grade analyzers and dynamometers at a fraction of the price of competitive systems in the market.

## Sensors' Dr. Bertrand Lanher to Present at DEER

We are pleased to announce that Sensors' Dr. Bertrand Lanher will be presenting the SEMTECH LASAR technology at the upcoming DEER conference. The Directions in Engine-Efficiency and Emissions Research conference will be held in Detroit, Michigan on October 3-6. This conference marks the 17th anniversary that the US Department of Energy has sponsored this event, for the public exchange of state-of-the-art advanced combustion engine research and development. Dr.

Lanher will be presenting *Combining the Feedback Absorption Laser Spectroscopy, Amplified Resonance and Low Pressure Sampling for the Measurement of Nitrogen-Containing Compounds in Automotive Emissions* at 11:40 on Thursday, October 6th. We invite you to listen to his presentation, and visit us at booth 321.
